December 2020

6th Place – Acadnet Nationals

May 2020

About me

I am a huge fan of hackathons & Open-Source in general.

Passionate about Computer Vision – one of my projects is to build a model car (1:15 scale) that drives itself, using a Raspberry PI to process the video feed. _GitHub Repo_

Looking for an internship as a Web / Mobile / Backend Developer, or in Computer Vision.

EXPERIENCE

FREELANCE WEB DEVELOPER

Freelance, Cluj-Napoca, RO / December 2020 - Present

- Developing a complete solution for my client's needs, especially mobile-first websites.
- Close collaboration with the clients at every step to make sure that I'm on the right path with their wishes.
- Latest delivered project – _davinet.ro_:
    - Built with Svelte as the framework and Bulma for styling.

FULL STACK MOBILE & EMBEDDED DEVELOPER

Academia DpIT & Bosch ECC, Cluj-Napoca, RO / May 2020 – November 2020

- Our team created a product meant to make you feel safe all the time – _Safe Signal Repo_

I worked on:

- Mobile – our app (Flutter) especially on the BLE communication (implemented with FlutterBlue) and on the Google Maps & Geocoding integration.
- Backend – our API (Flask / MySQL) that was storing data about reports in the user's zone.
- Hardware / Embedded – on the CYBLE-222014 BLE Module firmware (ARM Cortex M0) and on the physical design of the bracelet.
